GANTT	2006				2007				2008			
	1st year				2nd year				3rd year			
Tasks/months	Feb-Mar	Apr-Jun	Jul-Sep	Oct-Dec	Jan-Mar	Apr-Jun	Jul-Sep	Oct-Dec	Jan-Mar	Apr-Jun	Jul-Sep	Oct-Dec
ACTUAL TASK 1: Assessment of the existing situation in Morocco	∢ ⊖											
and in the EU			Start Date									1
Assessment of the existing situation and existing management schemes in Morocco regarding sewage sludge & BOW	•		< <mark> </mark> 2006									
Assessment of the existing situation and existing management schemes in the EU regarding sewage sludge & BOW	•	•										
Review of composting practices in the EU	•											
Trip to composting facility in Germany												
Trip to composting facility in Switzerland												
PLANNED TASK 1: Assessment of the existing situation in Morocco and in the EU	• ····	•••••										
Assessment of the existing situation and existing management schemes in Morocco regarding sewage sludge & BOW												
Assessment of the existing situation and existing management schemes in the EU regarding sewage sludge & BOW	••••••	-										1
Review of composting practices in the EU	4											
Trip to composting facility in Munich-Germany	() ()											ļ
Trip to composting facility in Frankfurt-Germany	0											<u> </u>
ACTUAL TASK 2: Design and Construction of an innovative aerobic composting system for sludge treatment				+								
Design of the composting system (main phase & maturation)		•										
Construction of the composting system				•								
Completed composting unit												
PLANNED TASK 2: Design and Construction of an innovative aerobic composting system for sludge treatment												
Design of the composting system		•	••••••									
Construction of the composting system			<	··• >								
Completed composting unit				52								
PLANNED TASK 3: Development of sludge aerobic composting process Optimisation of the operation of the pilot composting systems						••••						
Physico-chemical analysis of sludge generated from the WWTP				.)								
Development of aerobic composting processes using sludge & BOW				∢		·····Þ						

Development of alternative composting processes and optimization of the system				∢	_	•••••					
Composting unit operating under optimal conditions											
PLANNRD TASK 4: Evaluation of compost products as soil improvers								••••			
Development of phytotoxicity tests to evaluate suitability of compost end product for agricultural application						-		•••••			
Examination of the effects of compost on selected crops						 →		····· •			
PLANNED TASK 5: Alternative uses of compost – Market opportunities in Morocco								.			
Assessment of the alternative uses of the compost products								.			
Suggestions for the development of compost market in Morocco											
PLANNED TASK 6: Development of guidelines and specifications covering the sludge composting process Characterization and use of compost as soil improver									•••		
Development of specifications on the optimum operation of the composting system											
Development of specifications on the quality of the compost product								 √	•		
Development of guidelines on the rerquirments for compost use								∢			
ACTUAL TASK 7: Dissemination and trainning	•										
PLANNED TASK 7: Dissemination and trainning	••••••	•••••		•••••	•••••	•••••	•••••		•••		
ACTUAL TASK 8: Management and reporting to the EC	•										
Kick-off meeting	•										
Formulation of Steering Committee and of Management Team	•										
Endorsement of Action Plan											
Progress Reports					ress Repo	rt					
Interim report											
Final Report											
PLANNED TASK 8: Management and reporting to the EC	•••••		•••••		• • • • • • • • •		• • • • • • • • •	•••••	•••		
Kick-off meeting	0										
Formulation of Steering Committee and of Management Team	0										
Endorsement of Action Plan	() ()										
Progress Reports										End Date	
Interim report					E.1		- E2			< <mark> </mark> :008	
Final Report									12
