Departure from the conference venue

9.00-10.00

Visit at the Food4Feed LIFE project pilot unit in Heraklion, where food wastes from hospitality units are transformed into animal feed, utilizing solar energy. The units consists from a pretreatment area where food wastes are hand sorted and grinded and a solar drying hall, with two drying corridors and automated turning systems.

10.00-11.00

Visit at a Biogas Power Plant of 999 kW, located at the Industrial Area of Heraklion. The plant started its commercial operation in 2017 at 500 kWel and expanded in 2018 up to 999 kWel. The biogas plant applies cutting-edge technologies at the most critical points of production process. It is the first waste to energy power plant for municipal organic waste in Greece with collection to the source (expired packaged food from super markets, restaurants, hotels etc.).
