What is recommended
by the good
environmental practices?

Directive nº 2008/98/CE

Screenings

Grit

There are
already some
solution!

- **Screenings** - biological treatment by composting or anaerobic digestion
- **Grit** - valorised through their use in construction

Screenings

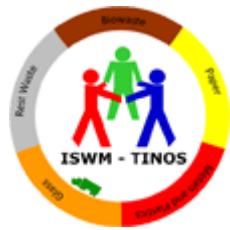

Grit

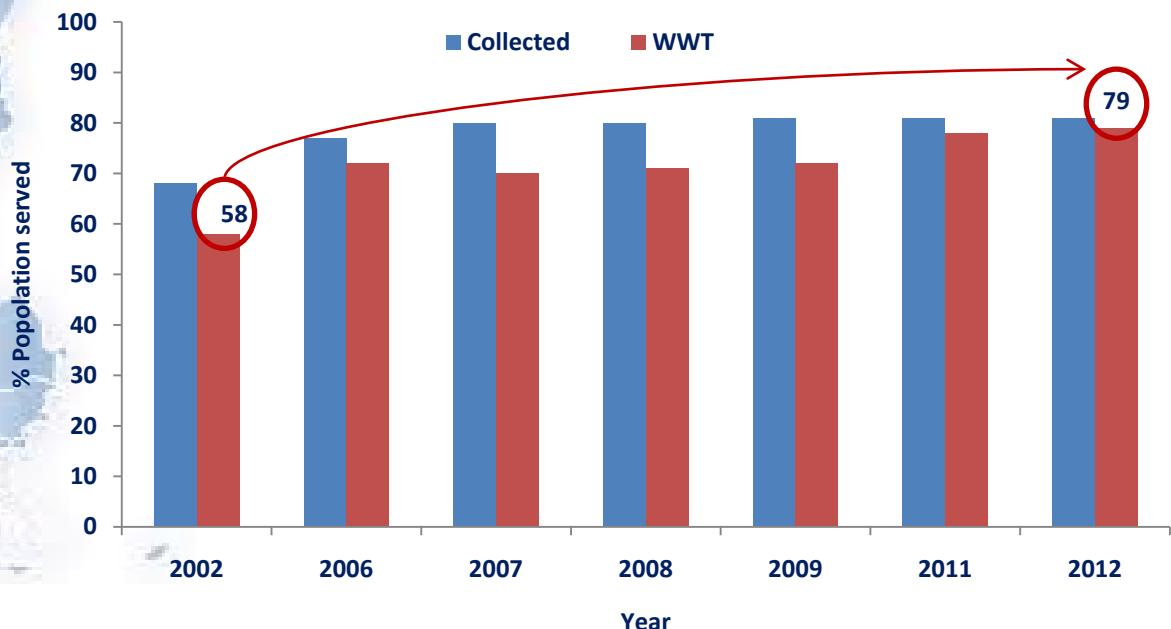

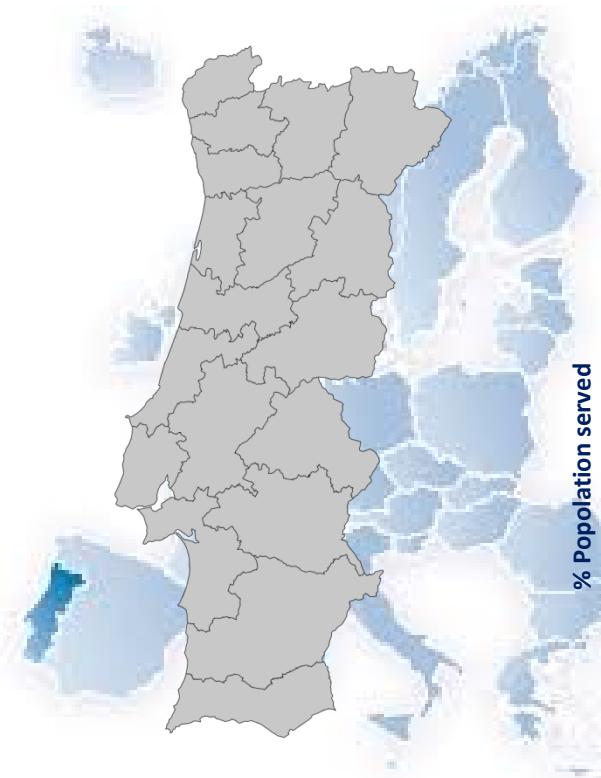

Some facts!

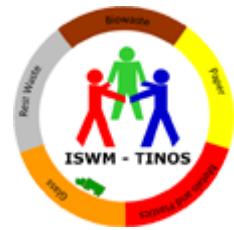

Portugal

A significant growth in municipal WWT

Some facts!

**There are a significant number of WWPT -
2,536 WWPT**
with different dimensions and configurations

e.g. SIMTEJO - WWTP ranges from 80 to 140,000 m³d⁻¹

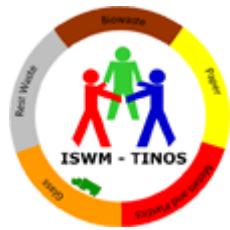

There are 283 ME

**The available data is
sparse and spread over
many sources**

Methodology

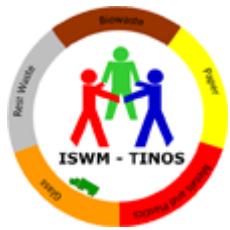

- Financial statements and other legal reports of Portuguese ME
- **Specific surveys** sent to **20 ME**
 - Served population
 - Wastewater flow treated
 - Screenings and grit productions

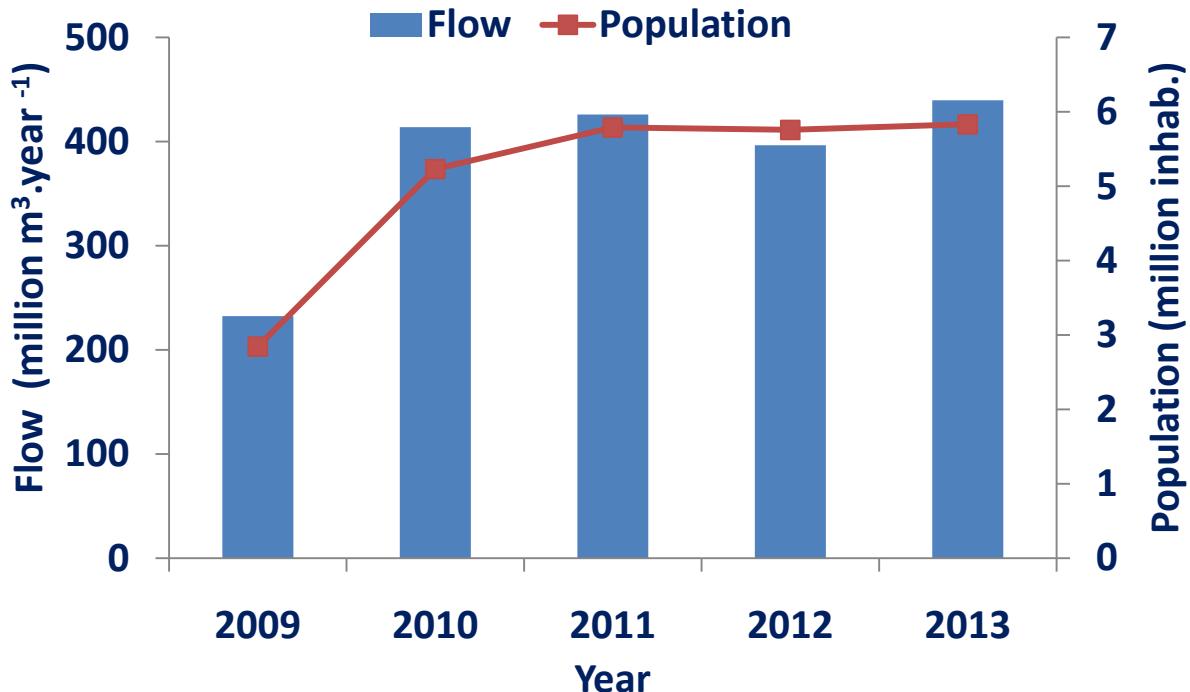

Screenings and grit

13 answers - but only **8 of ME**

Population served by WWT - 62%.

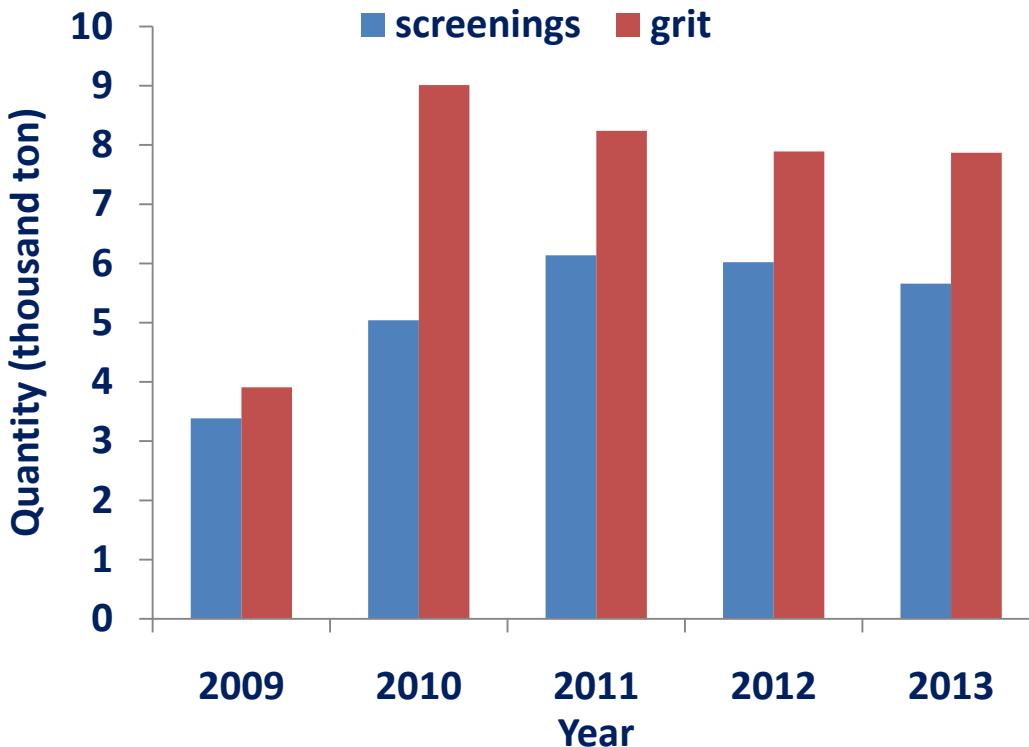

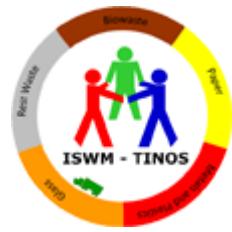

2013

Population - 5,832,830
Flow - 439,555,000 m³

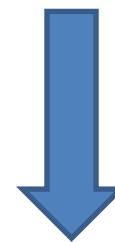

Águas de Santo André, Águas de Trás-os-Montes e Alto Douro, Águas de Zêzere e Côa, Águas do Algarve, Águas do Noroeste, Águas do Oeste, Águas do Sado, SANEST, SIMARSUL, SIMDOURO, SIMRIA, SIMTEJO, SMAS Caldas da Rainha.

Screenings and grit

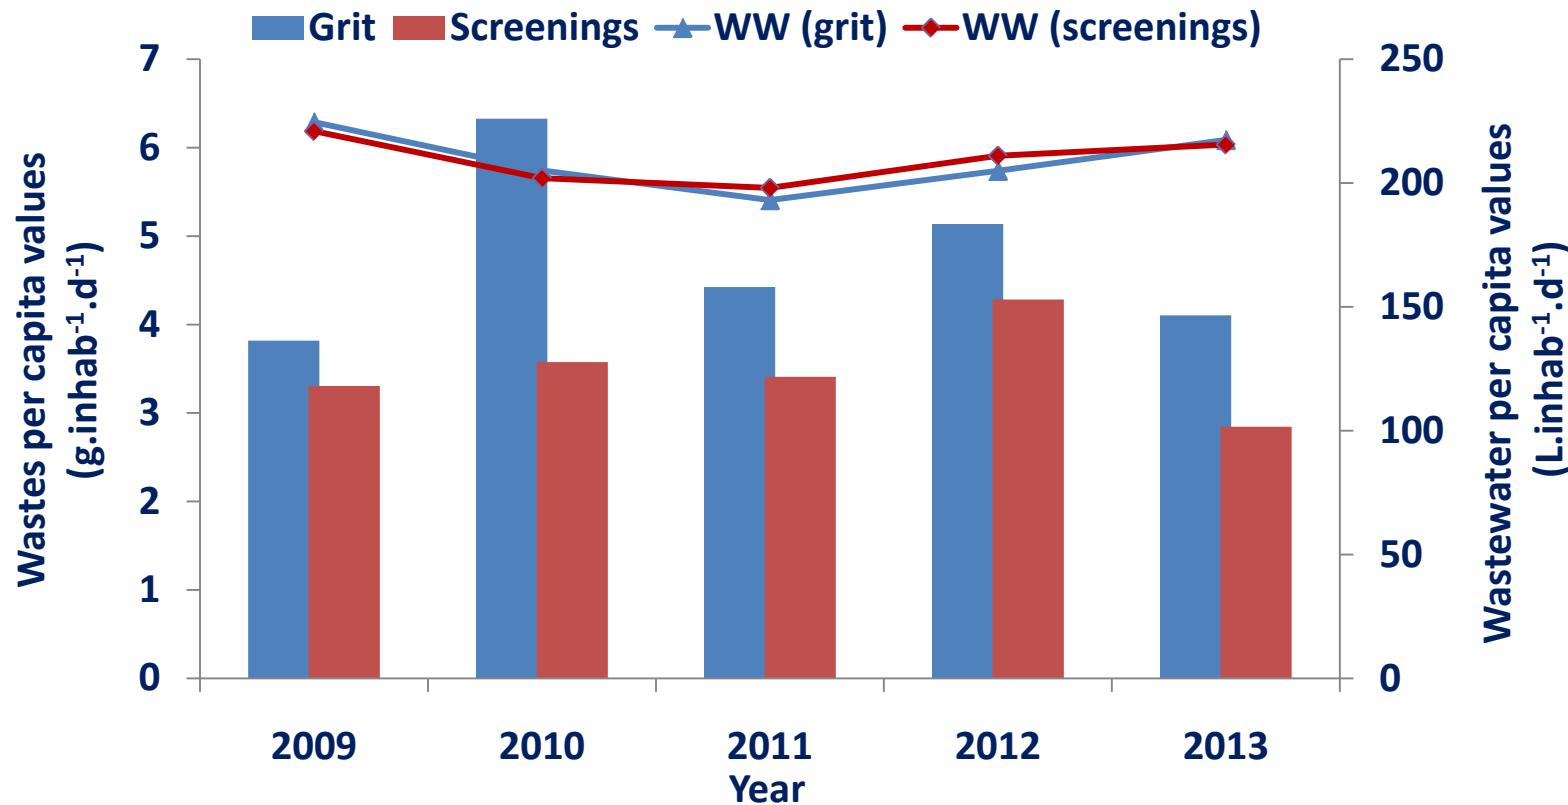

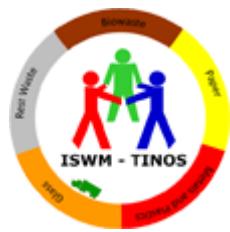

2013
Population - 5,832,830
Flow - 439,555,000 m³

2013
Screening - 5,659 ton
Grit - 7,869 ton

Per capita values

Screenings and grit

Portugal, 2013

Productions may be estimated

The screenings - 8,495 ton

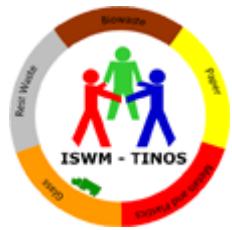

The screenings and grit - 12,256 ton

The amount of screenings and grit depend:

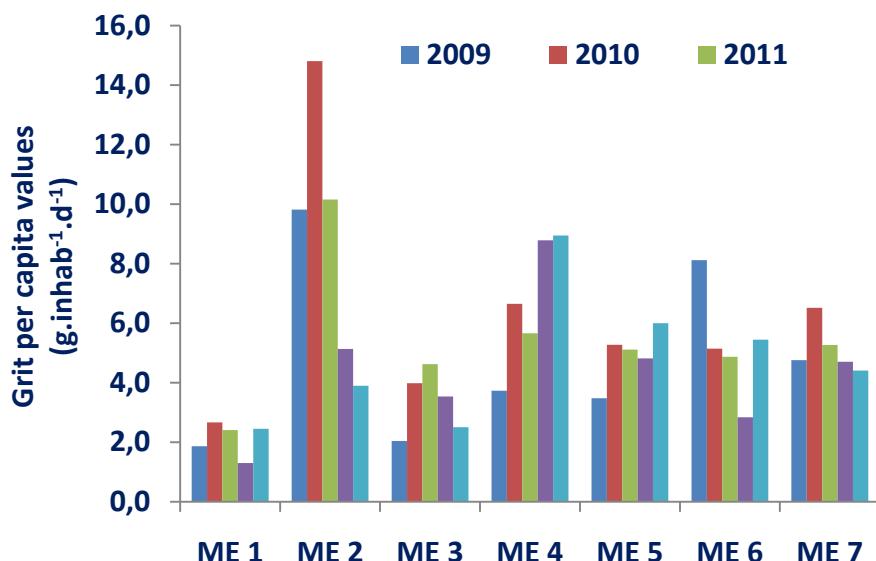

- WWTP number,
- Treatment technologies,
- Lifestyle,
- The sewer systems

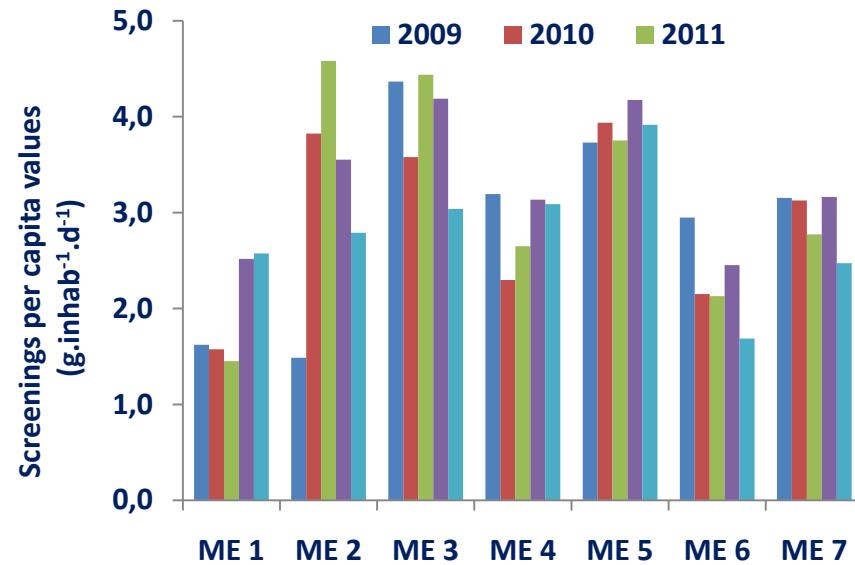

Per capita value

Grit

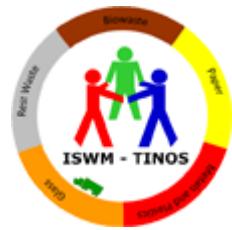

Screening

Screenings and grit

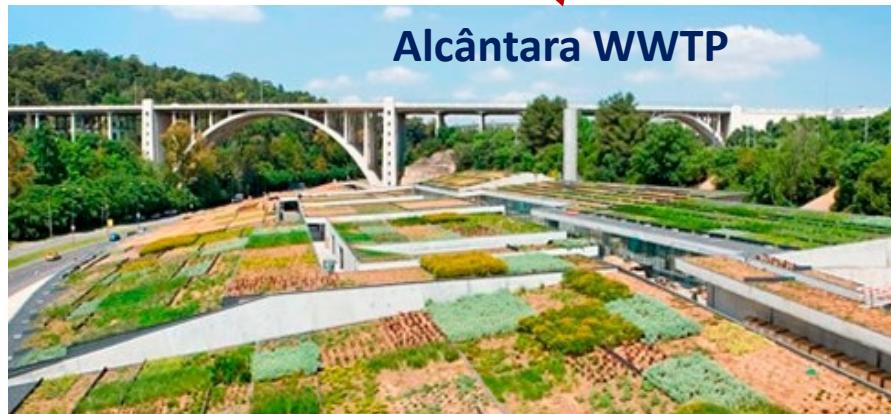

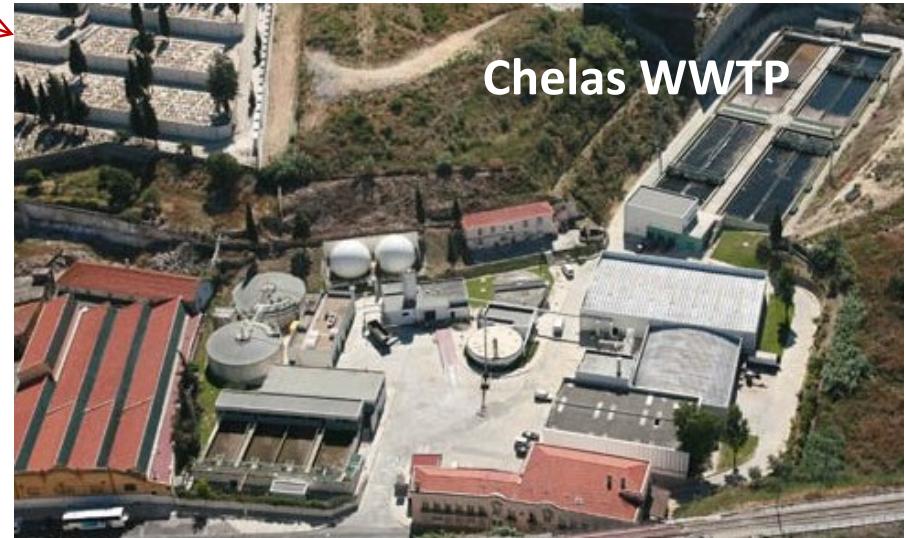

Waste produce in 2013

- per capita values of each ME
 - Screenings - 5,189 - 11,987 ton**
 - Grit - 7,353 - 26,734 ton**
- per capita values of an average of 13 ME
 - Screenings - 8,495 ton**
 - Grit - 12,256 ton**

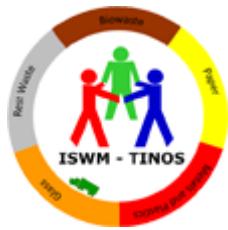

SIMTEJO

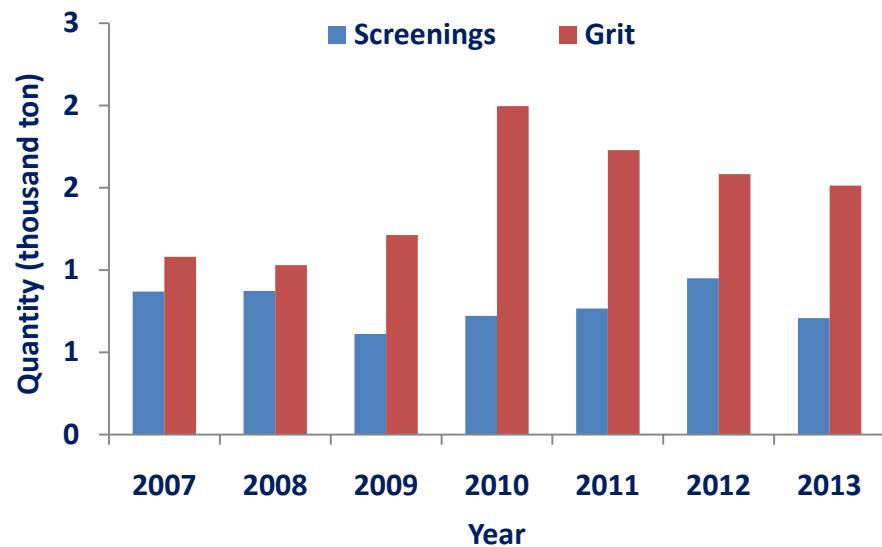

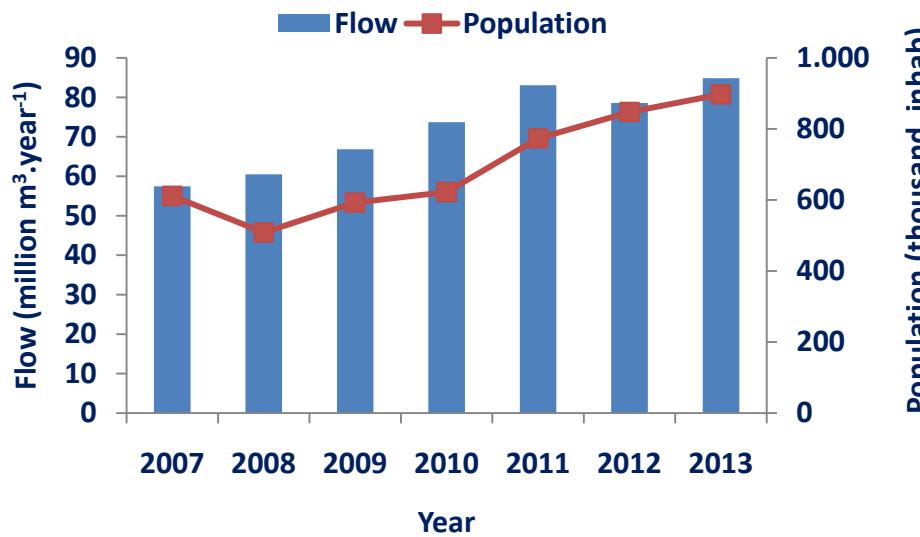

SIMTEJO

	Alcântara	Beirolas	Chelas
Project population (ep)	756,000	213,500	211,000
Population (2012) (ep)	531,146	177,207	139,349
Project flow ($m^3 \cdot d^{-1}$)	140,000	54,500	52,500
Flow (m^3) (2013)	53,708,041	16,971,070	14,177,553
Screenings removal	remove solids > 6 mm	remove solids > 6 mm	remove solids > 6 mm
Grit removal	Aerated grit and grease removal	Aerated grit and grease removal	Aerated grit and grease removal
Final disposal	Landfilling	Landfilling	Landfilling

**Wastes removal equipment was identical
but
Different per capita wastes productions**

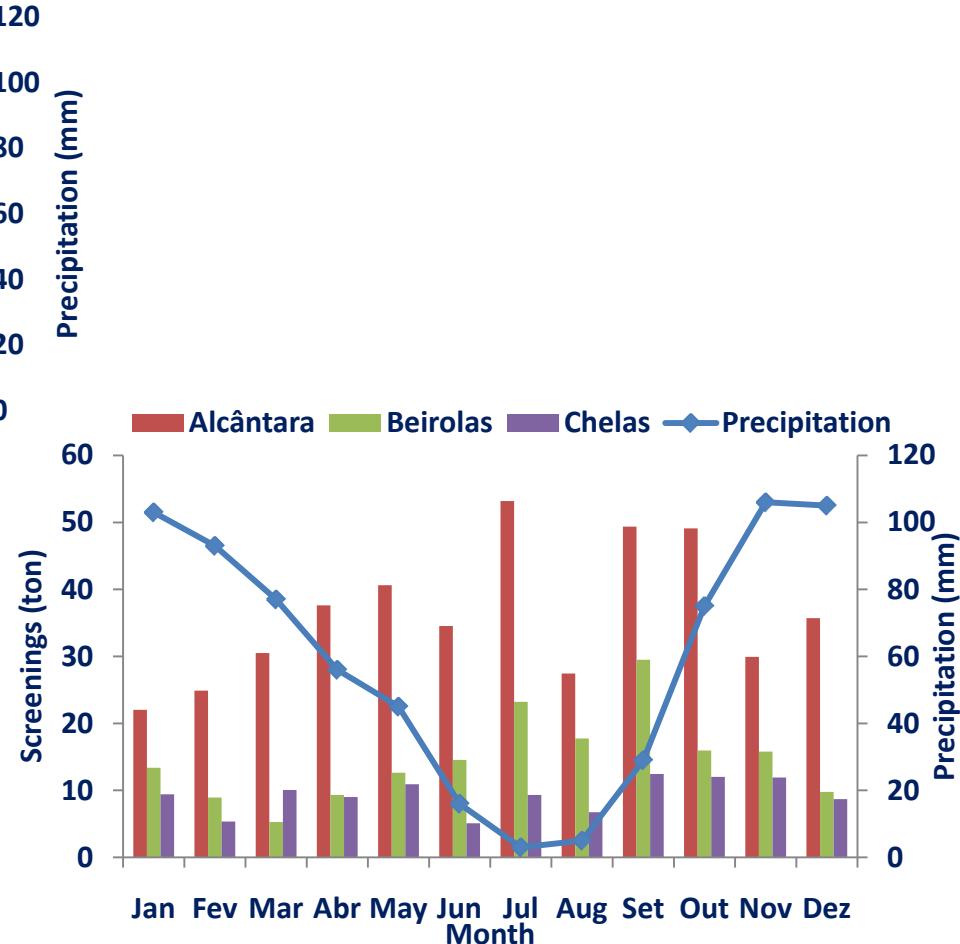

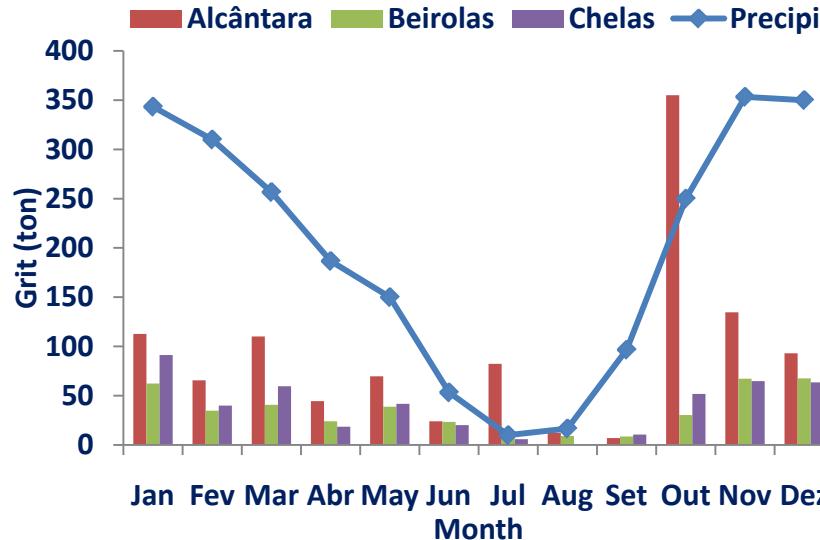

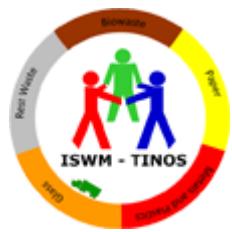

Precipitation in Lisbon

Precipitation in Lisbon

Screening and grit disposal

- Data collected from the surveys demonstrate that most of the wastes are sent to landfill.
- The estimated cost of landfilling (2013) were:
 - screenings ≈ 272,000 €
 - grit ≈ 392,000 €
- It can mean an immediate **saving of about 0.2%** in WWT costs by cubic meter

Screening and grit disposal

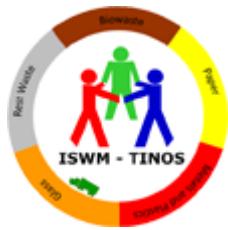

The screenings and grit valorisation has many **environmental and economic advantages:**

- Reduction the associated costs with screening and grit final disposal;
- Reducing the amount of waste sent to landfill, complying with legal guidelines;
- Reducing the amount of extracted aggregates, promotes the sustainable use of resources;

Conclusion

- ✓ Estimate values of wastes production from WWPT
was difficult to predict
- ✓ Production in Portugal:
 - 5,189 - 11,987** ton to screenings
 - 7,353 - 26,734** ton to grit
- ✓ The current final disposal of screenings and grit in Portugal **is landfills**.
 - ✓ it is possible to value and reuse screenings and grit
 - ✓ is necessary to invest in training and environmental awareness campaigns

Acknowledgements

We thank to the several wastewater entities in providing the screenings and grit productions data.

And

Would like to thank all of you for your kindly attention – thank you
